

### Short Reflection on PCK Results

The Profile Career Keys (PCK) assessment provided valuable insights into my skills, strengths, and potential career paths. According to Holland's RIASEC model, my highest-ranking interests were *Conventional* and *Investigative*, suggesting I thrive in structured, detail-oriented environments and enjoy exploring analytical and problem-solving challenges.

The results also highlighted my cognitive strengths, with 99th percentile scores in arithmetic reasoning, verbal ability, and spatial ability:

- **Arithmetic reasoning** underscores my ability to understand mathematical concepts and solve numerical problems quickly and accurately.
- **Verbal ability** reflects my skill in interpreting, analyzing, and expressing written information, which is critical in roles that involve communication and information synthesis.
- **Spatial ability** demonstrates my mastery of visual manipulation, spatial recognition, and problem-solving, a valuable skill in fields requiring data visualization and analysis.

These aptitudes align well with the recommended careers of *Database Administrator* and *Clinical Data Manager*. Both roles leverage my analytical strengths, organizational skills, and aptitude for processing and interpreting complex information. I am particularly intrigued by these roles because they align with my goal of pursuing a data-driven career that combines technical skills with impactful decision-making. These assessments have reaffirmed my confidence in my abilities and provided direction for my future career aspirations in data science and related fields.

### Masid-Danas

The SAS series gave me valuable insights into my potential work life and how to navigate it effectively. I discovered that I am well-suited for Conventional and Investigative careers, which match my skills and interests. The career sessions also broadened my perspective on roles beyond the developer positions I initially considered.

### Suri-Nilay

My past experiences and values have shaped my desire to pursue meaningful and structured work. I aim to apply my analytical and problem-solving skills in roles that bring personal fulfillment and organizational success. These reflections have strengthened my motivation to align my career choices with my strengths.

### Taya-Kilos

I want to become more proactive and confident in seizing opportunities aligned with my career goals. Improving my communication and adaptability will better prepare me for workplace challenges. These changes will help me build a stronger foundation for future success.

### Ramdam-Pakiramdam

The SAS series reminded me of the impact my actions have on my career and others. By continuing to grow, I can contribute meaningfully to my field while inspiring those I work with. Aligning my goals and actions will help me make a positive and lasting impact.
